

Date: 30 Nov 2019. 98/9/9.

Patient's Name: N. T.

Responsible Physician: Dr. Miri

Patient Presentation:

- A55year old female, with left breast cancer one year ago
- Neo-adjuvant chemotherapy 8 courses
- Surgery: MRM+ graft
- Adjuvant treatment: radiotherapy and hormone therapy
- Now there is an ulcerated malodor mass and matted axillary lymph nodes in right breast and local recurrence in left side around the graft
- Incisional biopsy: invasive ductal carcinoma
- Thoraco-Abdominopelvic CT scan: normal
- Bone scan: normal

Question: what is the next plan?

Recommended Plan: check of IHC and surgery

Local recurrence of left breast and right breast cancer
