

Date: 25 Jan 2019. 98/11/5.

Patient's Name: H. F.

Responsible Physician: Dr. Davari

Patient Presentation:

- A66 year old female, right breast mass
- Excisional biopsy: lost specimen
- 6 months' later mass recurred
- Surgery: BCS+ SLNB
- Pathology: IDC, grade II, 2.4cm, margins free, no node found
- Immunohistochemistry: ER-, PR-, HER2-, Ki67 60%
- Thoraco-Abdominopelvic CT scan: normal

Question: what is the next plan?

Recommended Plan: chemotherapy and then surgery (re-excision/ mastectomy and ALND)
