Patient's Name: A.F.S

Responsible Physician: Dr.Shahi

Patient presentation:

A 55 year-old woman with right breast multicentric cancer who underwent mastectomy & SLNB.

Pathology: 3 foci, IDC, multifocal multicentric, T=1.5 cm, G1, LVI -, ER+ (80%), PR+ (20%), HER2 2+, Ki67 5%, negative SLN

Question:

What is the next plan?

Recommendation:

- 1.IHC in all 3 foci.
- 2.Hormone therapy is recommended.
- 3.Oncotype Dx if HER2 is negative.
