

Date: 19.02.2022; 1400.11.30

Patient's Name: F.T

Responsible Physician: Dr.Aghili

Patient presentation: A 59 year-old lady with the past history of rectal cancer that underwent neoadjuvant chemo radiation & surgery & chemotherapy.

In screening mammography result there was a 11 *17 mm mass(B4)

Pathology : IDC , DCIS+ , (50% DCIS) , 15 mm , G1 , LVI - ,SNBx 1/3 , NSNBx 0/1 , Ki67 5% , ER (100%) , PR (100%) HER-2 negative

Question:

What's the next plan?

Is adjuvant chemotherapy needed?

Recommendation:

Systemic therapy then endocrine therapy are recommended.
