Patient's Name: A.D

Responsible Physician: Dr.Alipour

Patient presentation: A 50 year-old woman known case of metastatic breast cancer (lung & rib) that systemic therapy was done for her

PH/E: (before therapy): A large mass with bleeding at inferior of her right breast
She had good response to systemic therapy and she referred for surgery

Question:

Does she get benefit from surgery?

Recommended plan:

- 1-Brain MRI is recommended.
- 2-Surgery is considered.
