

Date: 15.04.2023; 1402/01/26

Patient's Name: S.A

Responsible Physician: Dr.Gomar

Patient presentation: A 44 year-old woman with right breast cancer.

CNB: IDC with Lobular features, Grade: 2, ER: 30%, PR:30%, HER-2: Negative, Ki67: 20%.

Radiology: 3 Cystic Liver lesions

Ph/E: Right Upper Extensive Edema

Question:

What is the plan for Liver lesions and Edema?

What is the plan for Right Upper Limb?

Recommended plan:

- 1.Right Upper Limb: Extra Color Doppler Ultra Sonography.
- 2.Liver: Ultra Sonography (probably simple cyst).
- 3.Surgery.

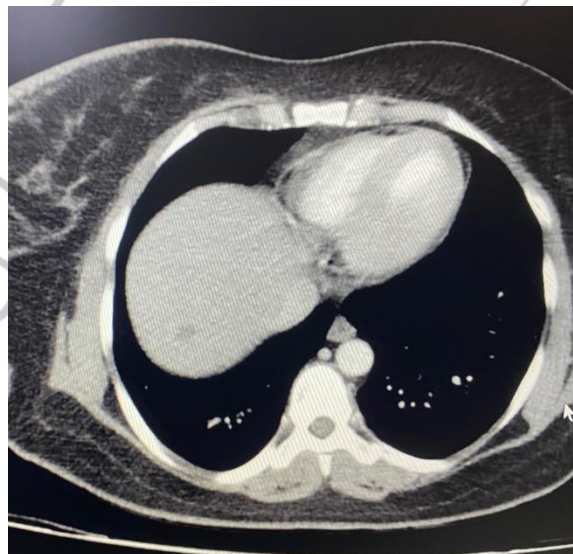

Figure1: Liver Lesion, probably simple cyst
