

Date: 15.04.2023; 1402/01/26

Patient's Name: M.G

Responsible Physician: Dr.Ranjbar

Patient presentation: A 42 year-old woman with locally advanced Breast cancer. She underwent Neoadjuvant chemotherapy (NAC) and Breast-Conserving surgery (BCS).

Pathology: ER: positive, Tumor size: 27mm, LVI: positive, EIC (Extensive intraductal component): negative, Margins: Deep margin is involved; lateral Margin < 2mm, LVI: very close to margin.

Question:

Does she need re-excision?

Recommended plan:

- 1-There is no need to re-excision.
- 2- Radiotherapy is recommended.
