

Date: 29.04.2023; 1402/02/09

Patient's Name: Z.Z

Responsible Physician: Dr.Omranipour

Patient presentation: A 39 year-old woman with Left breast cancer, Nipple-sparing Surgery (NSM) is done.

Pathology: Mucinous carcinoma, ER: Positive, PR: Positive, Her-2: Negative, Ki67: 12%, Tumor size: 35mm, SLNB: 0/4

Question:

Is Chemotherapy needed or not?

Recommended plan:

Pathology review, if the result is only Mucinous, no chemotherapy is needed.
