Patient's Name: L.S

Responsible Physician: Dr.Miri

Patient presentation: A 50 year-old woman with self-history of left Breast cancer, she underwent BCS, ALND, Radiotherapy and chemotherapy in 1397 (HER-2: positive, Lymph nodes: 16/19 are involved). Now she has recurrence in her left Supraclavicular lymph node (HER-2: positive, Ki67: 30%). Chemotherapy is done.

PET scan: Normal.

Question:

Does she need local treatment for supraclavicular Lymph nodes?

Recommended plan:

- Local treatment with Radiotherapy.
