

**Date:** 09.03.2024; 1402/12/19

**Patient's Name:** M.H

**Responsible Physician:** Dr.Omranipour

**Patient presentation:** A 62 year-old woman with history of Papillary thyroid carcinoma 40 years ago and laminectomy because of back pain. Now Because of low back pain CT scan was performed.

**CT scan:** Right breast and left breast mass, one lung lesion.

**Biopsy:** Right: IDC, ER: 90%, PR: 90%, HER-2: negative, Ki67: 12%.

Left: Suspicious, ER: positive.

**Question:**

What is the treatment plan?

**Recommended plan:**

- 1- Biopsy of lung
- 2- Review of left breast pathology
