

Date: 09.03.2024; 1402/12/19

Patient's Name: S.H

Responsible Physician: Dr.Omranipour

Patient presentation: A 40 year-old woman with history of reduction mammoplasty 2 months ago.

Pathology: IDC, Tumor size: 9mm, Grade: 1, ER: 100%, PR: 100%, HER-2: negative, Ki67: 5%.

Normal imaging before surgery.

MRI after surgery: only post-op change.

Question:

What is the treatment plan?

Recommended plan:

- If MRI is normal, best plan is mastectomy and SLNB, if not, SLNB then Radiotherapy.
