

Date: 16.03.2024; 1402/12/26

Patient's Name: M.R

Responsible Physician: Dr.Elahi

Patient presentation: A 34 year-old woman with right breast mass and back pain since last year and history of Tuberculosis.

Sonography: 58*31mm mass.

Biopsy: Mucinus carcinoma, Grade: 1, LVI: negative.

Bone scan: Single vertebral metastasis in T6.

MRI of Spine: No metastasis.

Question:

What is the treatment plan?

Recommended plan:

- 1- Not metastatic, suitable for upfront surgery,
- 2- No need for NAC because of mucinous type.
