Patient's Name: Z.E

Responsible Physician: Dr. Esfandbod

Patient presentation: A 68-year-old woman underwent MRI due to a suspicious lymph node in the left armpit on ultrasound. Three suspicious lymph nodes were found at level 1 on the MRI. FNA was performed and it was reactive. Lymph adenopathy is not palpable during examination.

Question:

What is the next treatment plan?

Recommended plan:

- CNB of the lymph node
