

**Date:** 10.08.2024; 1403/05/20

**Patient's Name:** M.M

**Responsible Physician:** Dr.Omranipour

**Patient presentation:** A 55 year-old woman underwent left lumpectomy due to intraductal papilloma with foci of DCIS (ER: positive), final pathologic results showed intraductal papilloma with foci of ADH. Review of the slides showed DCIS, Grade: 2, 8mm and superior and lateral margins were very close (less than 1 mm).

**Question:**

What is the plan of adjuvant treatment?

**Recommended plan:**

- Re-excision of margin.
- Radiotherapy, endocrine therapy or mastectomy and endocrine therapy.
- MRI for evaluation of extension of tumor.
