

**Date:** 11.05.2024; 1403/02/22

**Patient's Name:** S.V

**Responsible Physician:** Dr.Jalaeifar

**Patient presentation:** An 81 year-old woman with inflammatory breast cancer (triple negative, without metastasis) referred to clinic. According to the oncologist, the patient cannot tolerate chemotherapy.

**Question:**

What is the best treatment plan?

**Recommended plan:**

- Due to inflammatory breast cancer and good performance status and cardiology consultation, the patient can be referred for Neoadjuvant chemotherapy.
