

**Date:** 13.04.2024; 1403/01/25

**Patient's Name:** T.A

**Responsible Physician:** Dr.Jalaeefar

**Patient presentation:** A 60 year-old woman with a history of post NAC modified radical mastectomy in 2018 underwent a vacuum assisted biopsy due to suspected microcalcification (B4b) of the contralateral breast, which was the cause of LCIS.

**Question:**

What is the plan treatment plan?

**Recommended plan:**

- Pathologic and radiologic findings were concordance and short term follow up (6 month later) was recommended.
