

Date: 20.04.2024; 1403/02/01

Patient's Name: L.A

Responsible Physician: Dr.Ebrahimi

Patient presentation: A 49 year-old woman who underwent bilateral reduction mammoplasty on 1402/12.

Mammography & Sonography: Bilateral scattered semi-obscured margin masses in both breasts which represented cysts and nodules via targeted Ultrasound, BIRADS: 3.

Initial & Reviewed pathology: Bilateral scattered foci of LCIS with Pagetoid Spread along ducts and florid hyperplasia.

Question:

What is the best treatment plan?

Recommended plan:

- 1- Bilateral breast MRI
- 2- Chemoprophylaxy with 20 mg Tamoxifen daily
