

Date: 27.04.2024; 1403/02/08

Patient's Name: Z.M

Responsible Physician: Dr.Omranipour

Patient presentation: A 62 year-old woman who underwent BCS and ALND due to left breast IDC (Tumor size: 36mm, Grade: 1, lymph nodes: 2/7 is involved)
Deep margin involved by invasive carcinoma focal and inferior margin involved by insitu component focal.

Question:

What is the best next plan?
Re-excision or Radiotherapy?

Recommended plan:

- 1- Margin re-excision
- 2- The patient referred for chemotherapy and the surgery will be done after the courses of treatment.
