Patient's Name: M.GH

Responsible Physician: Dr.Omranipour

Patient presentation: A 55-year-old women with left breast mass (IDC, 19mm, triple negative, Grade: 3).

She has undergone surgery (BCS and SLNB) after 4 sessions of chemotherapy.

Sentinel lymph node: 2 lymph nodes free of tumor.

Non-sentinel lymph node: 2 lymph nodes. One of them had micro metastases 2mm and less than 2mm extra nodal invasion.

Question:

What is the best plan for axillary treatment?

Recommended plan:

- Doesn't need dissection, Chemotherapy is recommended.
