Patient's Name: H.P

Responsible Physician: Dr.Majidnezhad

Patient presentation: A 60-year-old woman known case of End Stage Renal Disease & Diabetic Mellitus with IDC, (luminal A) in right breast who underwent MRM, deep margin is involved, 6 out of 7 Lymph nodes are involved. So she needs adjuvant therapy but it hasn't started yet because of wound discharge.

Question:

What is the next treatment plan?

Recommended plan:

- 1- Punched biopsy
- 2- Wound culture
- 3- Systemic therapy

Figure 1: Non healing wound.
