

Date: 16.11. 2024 ; 1403/08/26

Patient's Name: MM

Responsible Physician: Dr.Omranipour

Patient presentation: A 34 Y/O F known case of breast cancer in her right breast .(1401/10)

IDC III/III, ER-, PR: -, Her2: -, Ki67: 80%

She received NAC but the tumor was growing under chemotherapy so she underwent MRM + DTI + XRT +
Xeloda (1402/4)

Because of chest wall mass she underwent surgery (Mass & tissue resection) (1403/5)

T: 10cm

Poorly differentiated carcinoma

She had recurrence in mastectomy site for the second time, so she underwent surgery
(mass resection+ lung resection +pleural resection + 4th,5th resection)(1403/8)

T: 3.5cm,

Ribs & pleura: free of tumor

Lung: involved by tumor

CHEST CT: Lung nodule

Question:

What is the best plan?

Recommended plan:

Systemic therapy
(low Her-2)
