

Date: 22.02. 2025; 1403/12/04

Patient's Name: KA

Responsible Physician: Dr. Omranipour

Patient Presentation:

A 64 Y/O F.

1390: Rt. MRM + chemotherapy + XRT

IDC II/III, LN :21/29 +

ER -, PR -, HER-2: 3+, Ki-67: 20%

1398: Lt. MRM + chemotherapy +XRT

IDCII/III, LVI+, LN: 9/16+

1399: Skin lesions appeared in left arm and extended to chest wall

Skin biopsy: metastatic

She is being treated with Herceptin +Novelbin +Gemcitabine

Question:

Next plan? Is Limb amputation advisable?

Recommended plan:

Change the medical agent & limb amputation is not a good choice.
