

**Date:** 29.02. 2025; 1403/12/11

**Patient's Name:** FE

**Responsible Physician:** Dr. Ebrahimi

**Patient Presentation:**

A 48 Y/O F, presented with a screen detected segmentally distributed (UOQ) + macrocalcification in Rt. breast (4c)

US: B0

VAB Bx: DCIS, ER+

MRI: Rt. Breast 10-3 o'clock, 3 masses

Extension to peri areolar skin 11 o'clock

Breast MRI shows retro areolar lesions

**Question:**

Next plan?

**Recommended plan:**

Breast MRI was reviewed.

Upper part of right breast & NAC involved so SSM is preferable.
