

**Date:** 08.03. 2025; 1403/12/18

**Patient's Name:** PG

**Responsible Physician:** Dr. Mohagheghi

**Patient Presentation:**

A 50 Y/O F, presented with Lt. breast bloody discharge,

MG: Macrocalcification in upper part of Lt. breast (4b)

Lt. breast VAB:

DCIS (extensive /micropapillary feature)

She underwent BCT:

DCIS. Extensive, superior & medial & lateral margin involved

RE- excision of lower margin: involved by DCIS, ER: 100%, PR: -

Breast MRI shows diffuse lesions in breast

**Question:**

Best plan?

**Recommended plan:**

The post of breast MRI was reviewed, it had some suspicious lesions so SSM is best choice.
