

Date: 21.12. 2024; 1403/10/01

Patient's Name: FJ

Responsible Physician: Dr. Karimi

Patient presentation: A 68 Y/O female presented with a skin nodule in the axilla, and axillary mass resection was done 5 months ago:

Un-differentiated ca/PanCK+/ER+/GATA+/Her2 -

Axillary LN biopsy:

Involved by IDC

She underwent tumor site resection (margins) + axillary dissection:

One margin involved (1 focus) 2 mm/

LN: 2 out of 7 lymph nodes positive

Question:

Advice?

Recommended plan: Re-excision of margin + systemic therapy + XRT
