

Date: 15.11.2025; 1404/08/24

Patient's Name: S.Z

Responsible Physician: Dr. Rajab pour

Patient presentation:

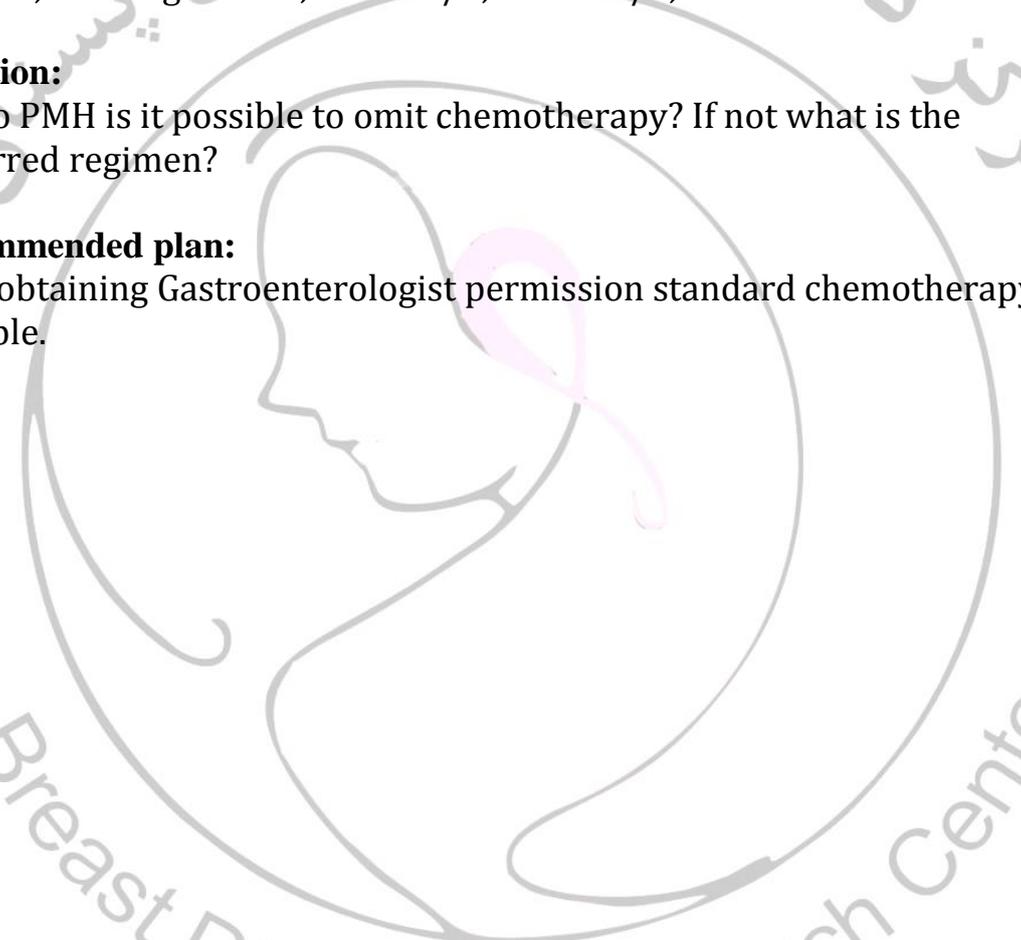

69 Y/O female PMH: autoimmune hepatitis and liver cirrhosis (PBC), Rt breast cancer, IDC(ER: 100%, PR: neg, HER-2:+2(FISH: -)), BCS+SLNB, pT: 3cm, G2, all margins free, SLNB: 3/7, ALND: 0/9,

Question:

Due to PMH is it possible to omit chemotherapy? If not what is the preferred regimen?

Recommended plan:

After obtaining Gastroenterologist permission standard chemotherapy is possible.
