

**Date: 18.10.2025; 1404/07/26**

**Patient's Name: SH.A**

**Responsible Physician: Professor Esfandbod**

**Patient presentation:**

Triple negative breast cancer, negative genetic tests, after NAC there is 1.5cm tumoral residue; she is on Xeloda, PET scan: supraclavicular LN.

**Question:**

Does she need surgical local control of the tumor?

**Recommended plan:**

Reassess genetic study. Add cisplatin to the regimen. No surgery is advised.
