

**Date: 20.09.2025; 1404/06/29**

**Patient's Name: Z.P**

**Responsible Physician: Dr.Miri**

**Patient presentation:**

45 Y/O woman with history of mammoplasty

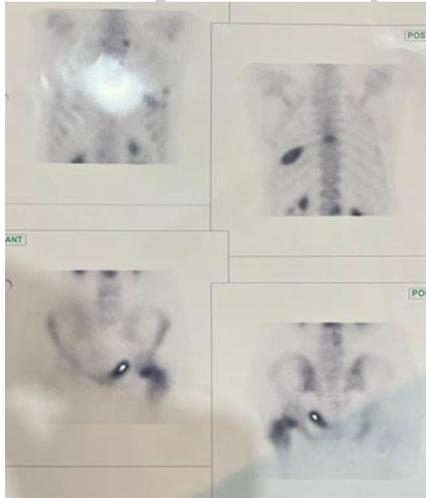

Right breast mass: 50mm LAP-

IDC

ER: + PR: + HER2: - Ki67: 10%

She had pelvic pain

**WBBS:**

Femur Biopsy: Metastatic carcinoma

ER+ PR- HER2+++ Ki67:50%

She underwent pelvic XRT 11 session

And systemic treatment

Now she is referred for surgery

**Question:**

Is she a candidate for surgery?

**Recommended plan:**

Finish chemotherapy then re stage and decision for surgery should be a MDT decision after re stage
