

**Date: 31.01.2026; 1404/11/11**

**Patient's Name: S.N**

**Responsible Physician: Dr. Nima Musavi**

**Patient presentation:**

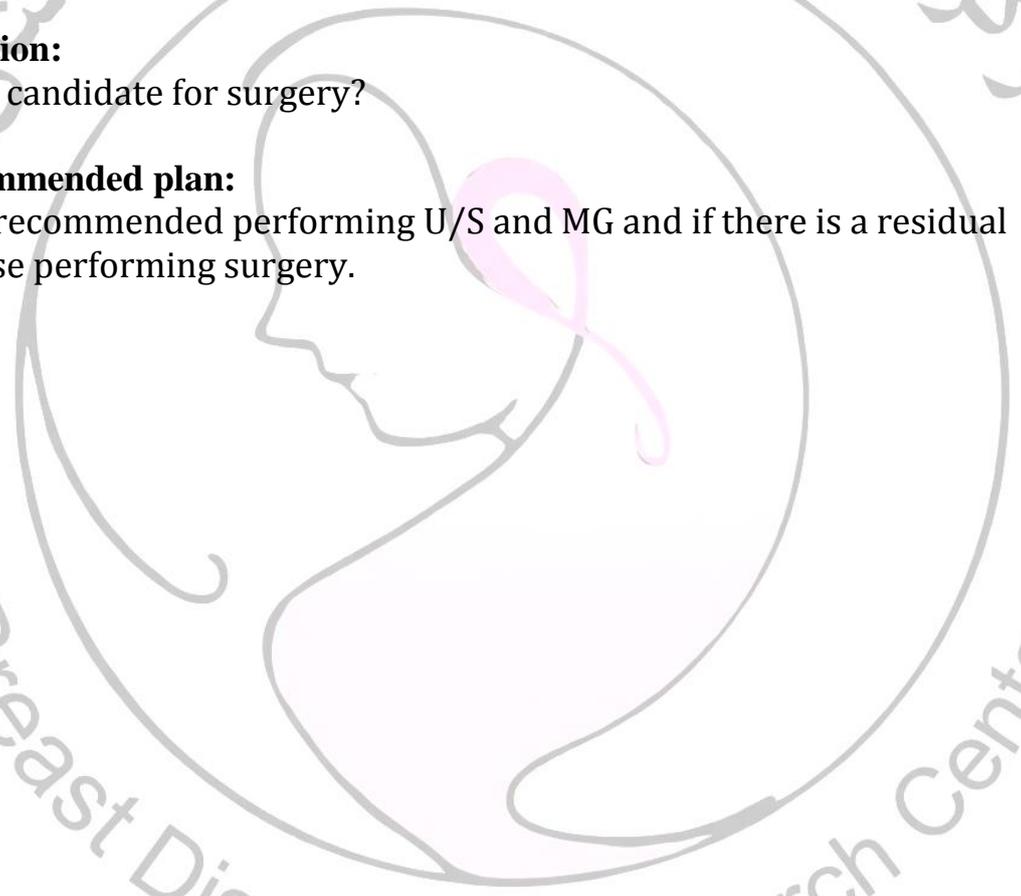

42 Y/O female with right breast cancer (ER-, PR:-, HER2:+, T2N1M1)  
multiple bony metastasis  
After systemic therapy (TCHP), bony lesions have complete response and  
breast mass has no uptake

**Question:**

Is she candidate for surgery?

**Recommended plan:**

MDT recommended performing U/S and MG and if there is a residual  
disease performing surgery.
