

**Date: 26.07.2025; 1404/05/04**

**Patient's Name: N.V**

**Responsible Physician: Dr.Lashkari**

**Patient presentation:**

44 Y/O woman with left breast cancer underwent BCT and ALND  
IDC G1

ER: + PR+ Ki67:20% HER2: neg

She subsequently underwent adjuvant chemotherapy

Now before her XRT she has 3 positive supraclavicular nodes (FNA proven)

**Neck physical exam:** the node is not palpable

**PET Review:**

4 suspicious LN in supraclav and one suspicious intramammary LN

**Question:**

What is the next step?

**Recommended plan:**

Metastasis Workup should be performed again and if negative for metastasis she is a candidate for excision of supraclavicular LN.
